

Areej Fatima

Senior Angular Frontend Developer • Team Lead • UI/UX Designer

Lahore, Pakistan | areejfatimak992@gmail.com | +92 341 7467616 | github.com/areejfatimak992

PROFESSIONAL SUMMARY

Senior Angular Frontend Developer and Team Lead who builds enterprise ERP and microservices-based products from the ground up — from the first client requirement to a successful production handover. Leads a frontend team across HRMS, finance, sales, distribution and operations domains, turning complex business logic into clean, scalable interfaces. Mentors junior developers through onboarding and code review, and is as comfortable explaining a concept as shipping it — a strong fit for industry delivery roles and for university IT, lab and teaching-support positions alike.

5+ Full-cycle ERP products delivered	300+ REST APIs integrated & tested	Team Lead Owning delivery end-to-end	BSSE Software Engineering graduate
---	---------------------------------------	---	---------------------------------------

CORE SKILLS

Frontend Engineering: Angular, TypeScript, JavaScript (ES6+), RxJS, Reusable Components, State Management

APIs & Integration: REST APIs, CRUD Operations, JSON, Swagger / OpenAPI, Postman, Error Handling

UI/UX & Design: Figma, Prototyping, Wireframing, Design Systems, Accessibility, Adobe Photoshop

MS Office & Documentation: Microsoft Excel (formulas, pivot tables, charts, data cleaning, reporting sheets), Microsoft Word (technical documents, reports, formatting, templates), PowerPoint (client & sprint presentations)

Markup & Styling: HTML5, CSS3, SCSS, Responsive Design, Cross-Browser Compatibility

Architecture: ERP & Microservices Frontends, RBAC, Permission-Driven UI, Modular Code Structure

CS Fundamentals: OOP, Data Structures & Algorithms, DBMS & SQL Basics, Software Design Principles

Professional Skills: Team Leadership, Client Requirement Gathering, Agile / Scrum, Git & GitHub, Code Review, Mentoring, Problem Solving

PROFESSIONAL EXPERIENCE

Senior Frontend Developer & Team Lead — Averlabz

Oct 2025 – Present • Lahore, Pakistan

- Team leadership:** Lead frontend development and a development team for enterprise ERP and microservices-based systems, owning client requirement gathering, solution design, estimation and delivery.
- Pharmacy Distribution System:** Built the Angular frontend for a complete pharmacy distribution ERP module, from client requirements through development and delivery.
- Chips (FMCG) Distribution System:** Delivered the Angular frontend for an FMCG distribution ERP module, integrating order, inventory and dispatch workflows end to end.
- Defence Rice Distribution Project:** Delivered a full monoservice-based project including a complete reporting suite; successfully closed and handed over to the client.
- Telecom Operations Project:** Developed the frontend for an operations-based telecom platform, integrating 300+ REST APIs with robust error handling, loaders and retry logic.
- Engineered Angular modules for inventory, finance and operations on reusable component libraries, with role-based access control (RBAC) and permission-driven UI rendering.
- Tested and documented endpoints with Swagger and Postman; maintained Excel trackers for API coverage, test status and module progress.
- Led client meetings, demos and UAT; prepared handover documentation in Word for stakeholders.
- Collaborated with backend and QA teams in Agile, running code reviews and mentoring junior developers.

Frontend Developer Intern — HNL ERP

Jul 2025 – Sep 2025 • Lahore, Pakistan

- Built an inventory management UI in Angular, plus reusable form, table and modal components adopted across multiple ERP modules.
- Integrated CRUD APIs across ERP modules and validated responses against the API documentation.

DOMAIN EXPERTISE

HRMS — employee, attendance & workflow modules • **Finance** — pricing, reporting & reconciliation • **Sales & Distribution** — order, inventory & dispatch • **Operations** — telecom & FMCG processes • **Role-Based Systems** — permission-driven UI • **Reporting** — operational suites & dashboards

TEACHING, MENTORING & KNOWLEDGE SHARING

- Mentor junior frontend developers in Angular, TypeScript and clean component architecture, guiding them through their first production modules.
- Use code review as a teaching tool — explaining the reasoning behind a pattern, not just flagging the issue.
- Translate complex ERP logic into plain explanations, walkthroughs and written documentation for clients, QA and new team members.
- Subject areas I can teach or support:** Web Engineering & Frontend Development • Programming Fundamentals (JavaScript / TypeScript) • Object-Oriented Programming • HCI & UI/UX Design • Software Design Principles • Web Technologies Lab.

UI/UX PROJECTS

Coffee Ordering App — mobile UI in Figma: onboarding, menu, customisation, cart, delivery tracking. • **Glasses E-Commerce Website** — responsive design with a modern layout and strong visual hierarchy.

EDUCATION & CERTIFICATIONS

BS Software Engineering (BSSE) — Lahore College for Women University

CGPA 2.98 / 4.00

Relevant coursework: Data Structures & Algorithms • OOP • Database Systems • Software Engineering • Web Engineering • HCI

Certifications: Web Development — Erozgar • UI/UX Design — Tech Minds

TOOLS & LANGUAGES

Tools: Angular CLI • Bootstrap • Git • Figma • Photoshop • Postman • Swagger • VS Code • MS Office **Languages:** Urdu (Native) • English (Professional)
